

Linux

Universally Useful Checks

- sudo permissions: `sudo -l`
- check directory permissions (read/write/executable): `ls -l | grep [d,-]rwx`
 - change `rwx` to any assortment(e.g., `r--` , `rw-`)
- Search for world-writable directories

```
# Find world-writable directories in $PATH
echo $PATH | tr ':' '\n' | xargs -I{} sh -c 'find {} -type d -perm -0002 2>/dev/null'
```
